

INTERNET RESERVATIONS WITH IMMEDIATE CONFIRMATION.

Cutting edge technology for fast, secure, cost-effective, and low maintenance service.

With the Internet poised to greatly influence how you do business, RSE, Inc. has optimized our technology to exploit the internet and make information available on a global spectrum. RSE's unparalleled ability to allow 'on-line real-time direct access' via Internet/Intranet to property inventory, availability, yield rating and instant confirmation is a feature embraced by corporate guests, travel agents, tour operators and wholesalers worldwide.

On some Web sites, customer will find a button or a link called "Reservations".

When invoked, customer will see a "form" to fill in and return to request information.

This is handled just like a fax request: a hotel clerk checks the availability, and contacts customer via phone, e-mail, fax, or mail, to notify if customer's request has been confirmed, if any alternatives are available, or if no rooms are available.

In all of these cases, confirmation or denial of a customer's reservation request is not returned to the customer immediately.

RSE's On-line Internet Reservation system offers their customers global availability and automatic booking, 24 hours a day, 7 days a week without the need of a staffed reservation desk.

THE BENEFITS

- On-line, Internet reservations with immediate confirmation.
- A Double Booking-Proof solution. No need to maintain separate in-house and on-line inventories.
- Complete control over on-line offerings, including pricing and availability.
- Cutting edge technology for fast, secure, cost-effective, and low maintenance service.
- Interactive, immediate response of availability.
- On-line response for your reservation confirmation.
- If there is no availability, customer can try another date, another accommodation type, or, if none are available, customer can immediately check on another date or simply make other arrangements.
- Global availability and automatic booking, 24 hours a day, 7 days a week without the need of a staffed reservation desk.
