

# WE CONNECT YOU TO UNIREZ, EXPEDIA, HOTELS.COM\*

Simple, automated connection. You can concentrate on running your business

The RSE, Inc. distribution interface connect your inventory real-time to travel sites, the GDS and gives on-site hotel staff easy-to-use, integrated tools through which they can manage multiple revenue channels, determine rate strategies and market unique promotions.

RSE's interface provides for real-time rates, availability, minimum stay days, closed for arrival and property booked automatically distributed to the four major global distribution systems (Amadeus, Galileo, Sabre and Worldspan) and thousands of travel Web sites, giving travel agents and consumers immediate access to your inventory around the world.

RSE's interfaces are two way interfaces. Any information runs out of your inventory to the connected sales channels and any reservation appears in your inventory.

## THE BENEFITS

- Availability and rates with immediate distribution to multiple outlets.
- Hoteliers no longer need to spend hours updating rates on numerous channels, saving time and reducing errors.
- Effective Yield-Management to optimize revenue.
- Additional sales channels direct connected including Web Site reservations.
- Receiving reservations online with inventory connection.
- If required automated charge of advanced deposit (RSE Credit Card interface required).
- Minimizing the risk of overbooking.
- No contingency handling necessary.
